## **Heat Shield**

DRYSPEC.COM

## (g) à 0 DRYSPEC (b) (a)

**Universal Exhaust Mount, 4"-6" Diameter** 

## Assembly

### Assembly Components

(a) Adhesive Backed Silicone .5"x19"	Qty 1
(b) Hose Clamp 4"-6" Diameter	Qty 1
(c) M6 Nylock Nut	Qty 2
(d) Adhesive Backed Silicone 1"x2"	Qty 1
(e) Bracket	Qty 1
(f) M6x16 - Lens Head Screw	Qty 2
(g) Heat Shield	Qty 1

#### **Tools Required**

1. 5/16" Open End or Socket Wrench 2. Tin Snips 3. Scissors

Step One: Use the bracket to secure the hose clamp to the backside of the Heat Shield using the M6 bolts and nuts. Step Two: Select the location along the exhaust that the heat shield is to be mounted. Wrap the 19" Silicone strip around the exhaust in the desired mounting location. Use a pair of scissors to trim the excess Silicone and discard. Step Three: Apply the 2" Silicone strip to the side of the bracket that will be mounting against the exhaust. Step Four: Slide the as-

sembled heat shield over your exhaust till the hose clamp is directly over the Silicone band a that has been placed around the exhaust. Use a 5/16 wrench to tighten the heat shield to the exhaust. Step Five: Use a pair of tin snips to cut off the excess band of the hose clamp.

# 100% WATERPROOF MODULAR DESIGN
